

Off-Grid/Hybrid Solar System: Ramasis Energy systems allow you to store your solar power in batteries for use when the power grid goes down or if you are not on the grid, a true off-grid house is able to operate completely independently of all traditional public utility services,

- Off-grid solar power systems store the generated power in to battery & use the same power at the time when without Sunlight.
- Available from 100 Watt to 500 KW Range.
- Eco-friendly.
- Highly reliable as the power is stored for emergency situation.
- Maximum utilization of generated power as if you load is less than generated power you can store in battery.
- Completely customize design it is more acceptable per the site & customer's requirement.
