

Solar Panels: Ramasis Energy offer a variety of Solar Panel, Solar panels are devices that convert light into electricity, a solar panel is a collection of solar Cells. It many small solar cells spread over a large area can work together to provide enough powers to be useful. The more lights that hit a cell, the more electricity it produces, so spacecraft are usually designed with solar panels that can always be pointed at the Sun even as the rest of the body of the spacecraft moves around, much as a tank turret can be aimed independently of where the tank is going.

- Perfect for battery maintenance, off grid lighting projects and use in caravans and boats over a weekend period.
- High efficiency crystalline cell for “all weather” charging.
- Walk on panel.
- Water resistant, robust construction for outdoor use.
- In built diode protects against battery discharge.
- 20 year cell warranty and 2 year module warranty.
- Eco-Friendly.
- Availability of Product Mono Solar Panel Ranges from 30W to 280 and Poly Solar Panel range from 30W to 255 W.
